Version No. : R1.0

Edition Time: December 2, 2014

NOTE:

Do not use the device in an enclosed environment or where heat dissipation is poor. Prolonged work in such space may cause excessive heat and raise ambient temperature, which may lead to automatic shut-down of the device for your safety. In the case of such event, cool the device in a well-ventilated place before turning on for normal use.

Getting to Know Your Device

Appearance

The following figure is only for your reference. The actual product may be different.

1. LED Indicators
2. Power Button
3. WPS Button
4. Micro USB Port
5. (U)SIM Card Slot
6. RESET Button
7. microSDHC Card Slot

NOTE:

microSDHC™ logo  is a trademark of SD-3C, LLC.

Indicators

Indicator	Status	Description
Network 	Red solid	Error status. Not registered to the mobile network, no (U)SIM card inserted or no network service available.
	Green solid	Registered to the 2G/3G network.
	Green blinking	Connected to the 2G/3G network and data is being transferred.
	Blue solid	Registered to the 4G network.
	Blue blinking	Connected to the 4G network and data is being transferred.
Wi-Fi 	Blue solid	WPS is active.
	Blue blinking	Wi-Fi is active.
	LED light off	Wi-Fi is off or your device is in sleep mode.
Battery 	Red blinking	The battery is empty. Please charge the battery.
	Red solid	<ul style="list-style-type: none"> The battery is low. Please charge the battery. The battery is in the over-voltage charging status.
	Green blinking	The battery is being charged.
	Green solid	The battery level is middle or high.
	LED light off	Your device is in sleep mode and not being charged, or the battery is not inserted.

Connection Scenario

Your device supports two methods to connect to the Internet and supports multi-clients for surfing on the Internet at the same time. The following figure is only for your reference.

- **4G Mode:** Use your (U)SIM card to access the Internet.

- **Internet Wi-Fi Mode:** Your device will connect to other WLAN device (hotspot device, wireless router, etc.) via Wi-Fi to access the Internet. The WLAN device has already connected to the Internet.

NOTE:

The subnets of your device and other WLAN device must be different.

Installing Your Device

1. Slide the back cover and remove it

2. Insert the (U)SIM card.

WARNING!

Your device does not support the micro-SIM and nano-SIM card or any other non-standard SIM cards. To avoid damage to the device, do not use those cards or any card holders.

3. Insert the microSDHC card if necessary.

4. Insert the battery.

5. Close the back cover.

Connecting to Your Device

Via Wi-Fi

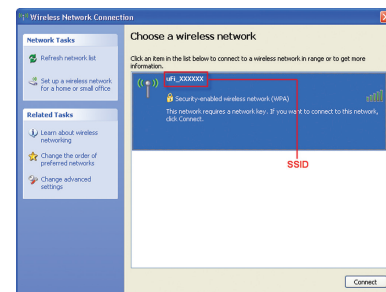

1. Power on your device directly.
2. Use your normal Wi-Fi application on the client to search for the available wireless networks.

NOTE:

Please set the client to obtain an IP address automatically referring to the chapter "Configuring your PC", and then the client will get an IP address like "192.168.0.101".

3. Select the SSID of your device, and then click **Connect**.

NOTE:

Please check the label on your device to get the default SSID.

4. Input the password, and then click **Connect**.

NOTE:

You may need to input the password for Wi-Fi connection. Please check the label on your device to get the default.

5. Wait a moment, and then the client will connect to your device successfully.

Via USB Cable

1. Connect to the device.

2. Power on your device.

Accessing the Internet

4G Mode

After the client connected to your device successfully, you can access the Internet in the **Automatic** or **Manual** mode. The default mode is **Automatic**.

Mode	Operations
Automatic	Your device will connect to the Internet automatically, and your clients can surf on the Internet directly.
Manual	<ol style="list-style-type: none"> Log in the 4G Mobile Hotspot page. Select Settings > Network Settings > Dial-up Settings> WAN Connection Mode > Manual, and then click Apply. Select Home, and then click Connect or Disconnect.

NOTE:

If you want to modify the detailed parameters of your device, please log in the 4G Mobile Hotspot page by visiting <http://192.168.0.1> or <http://ufi.ztedevice.com>. The default password is **admin**.

11

- Operating the modem may interfere with medical instruments such as hearing aids and pacemakers. Always keep the modem more than 20 centimeters away from such medical instruments when your modem is turned on. Turn the modem off if necessary. Consult a physician or the manufacturers of medical instruments before using the modem if necessary.
- Be aware of the usage limitation when using the modem at places such as oil warehouses or chemical factories, where there are explosive gases or explosive products being processed. Turn off the modem if necessary.
- Do not use electronic transmission devices in aircrafts, at petrol stations or in hospitals. Observe and obey all warning signs, and turn off the modem in these conditions.
- Do not touch the inner antenna area unless it is necessary. Otherwise the performance of the modem may be affected.
- Keep the modem out of the reach of little children. The modem may cause an injury if used as a toy.
- When the modem is operating, do not touch the metallic parts. Failing to do so may cause burns.

Using Your USB Modem

- Use original accessories or accessories that are authorized. Using any unauthorized accessories may affect the performance of the modem and violate the related national regulations about telecom terminals.

11

Internet Wi-Fi Mode

- Log in the 4G Mobile Hotspot page.
- Select **Settings > Internet Wi-Fi**.
- Enable** the Internet Wi-Fi Switch, and then click **Apply**.

- Connect to the WLAN device. There are two methods for your reference.
 - Select the WLAN device which will be listed in the **Wi-Fi Hotspot** area, and then click **Connect**.
 - Click **Add**, input the WLAN device information in the **Add Wi-Fi Hotspot** area, and then click **Apply**.

- After the client connected to the WLAN device successfully, you can access the Internet.

12

- Avoid using the modem near or inside metallic structures or establishments that can emit electromagnetic waves, because signal reception may be affected.
- The modem is not waterproof. Keep the modem dry and store it in a shady and cool place.
- Do not use the modem immediately after a sudden temperature change. In such case, dew may be generated inside and outside the modem, so do not use it until it becomes dry.
- Handle the modem carefully. Do not drop, bend or strike it. Otherwise the modem may be damaged.
- Only qualified personnel can dismantle and repair the modem.
- An operating temperature between -10°C and +60°C and a humidity between 5% and 95% are recommended.

Limited Warranty

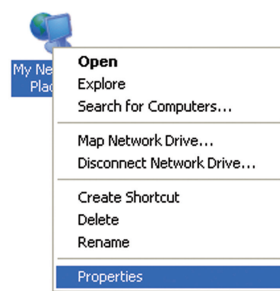

- This warranty does not apply to defects or errors in the product caused by:
 - Reasonable abrasion.
 - End users' failure to follow ZTE's installation, operation or maintenance instructions or procedures.
 - End users' mishandling, misuse, negligence, or improper installation, disassembly, storage, servicing or operation of the product.
 - Modifications or repairs not provided by ZTE or a ZTE-certified individual.
 - Power failures, surges, fire, flood, accidents, and actions of third parties or other events outside ZTE's reasonable control.

12

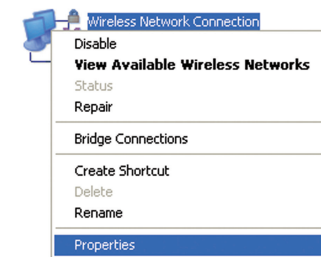

Configuring Your PC

Follow the following steps and figures for Windows XP to configure the Internet Protocol for your Wi-Fi connection.

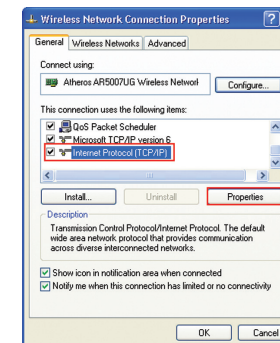

- Right-click **My Network Places**, and then select **Properties**.

- Right-click **Wireless Network Connection**, and then select **Properties**.

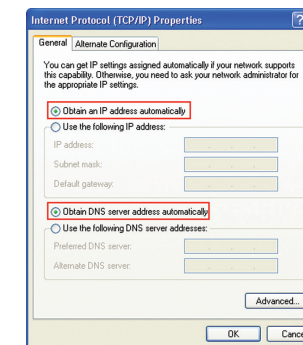

- Select **Internet Protocol(TCP/IP)**, and then click **Properties**.

14

- Select **Obtain an IP address automatically** and **Obtain DNS server address automatically**, and then click **OK** to finish the configuration.

Warning and Notice

To the Owner

- If inadequately shielded, some electronic devices may be affected by the electromagnetic interference caused by the modem, such as the electronic system of vehicles. Consult the manufacturers of such devices before using the modem if necessary.

15

Troubleshooting

Problem	Suggested Solution
Can not establish the USB connection between your device and PC.	<ul style="list-style-type: none"> Install the software, and run the installation program in the path of My Computer. If the driver of your device is abnormal, please reinstall the software. You need to uninstall the software first.
Can not establish the Wi-Fi connection between your device and client.	<ul style="list-style-type: none"> Make sure the Wi-Fi function is active. Refresh network list and select the correct SSID. Check the IP address to make sure your client can obtain an IP address automatically in the Internet protocol (TCP/IP) properties. Type the correct network key (Wi-Fi password) when you connect to the device.
The client connected to the device can not access the Internet.	<ul style="list-style-type: none"> Make sure your (U)SIM card is available. Change the location to find a place with good signal. Check WAN Connection mode setting. Contact with your service provider and confirm your APN settings.

19

Problem	Suggested Solution
When I use Internet Wi-Fi mode, the client cannot access the Internet.	<ul style="list-style-type: none"> Make sure the other WLAN device has already connected to the Internet. Make sure that the subnet of your device and the other WLAN device is different
Can not visit the 4G Mobile Hotspot page.	<ul style="list-style-type: none"> Enter the correct address. The default address is http://192.168.0.1 or http://ufi.ztedevice.com. Only use one network adapter in your PC. Do not use any proxy server.
About the password	<ul style="list-style-type: none"> For the Wi-Fi connection password, please check the label on the device. The default password of the 4G Mobile Hotspot page is admin. If you changed the password and forgot the new password, you need to restore the device to the factory default settings.
